

2014 Annual Report

Rockland County Sheriff's Office

SHERIFF LOUIS FALCO III

Message from Sheriff Louis Falco III

Dear Friends:

In 2014, the Rockland County Sheriff's Office continued to move forward with our efforts to create a more effective and efficient law enforcement agency, by continuing to improve the services offered to the residents of Rockland County.

I am proud to report that during the past year all four Divisions of the Sheriff's Office, Civil, Communications, Corrections and Police made substantial improvements to keep our county safe, while continuing to focus on our core mission. Part of that core mission is to coordinate the counter-terrorism efforts in Rockland in collaboration with the Town and Village Police Departments and our State and Federal partners.

As part of those efforts, a two county pilot project was established and the Sheriff's Office received funding from the New York State Division of Homeland Security and Emergency Services, to install an interoperable emergency communications system called Mutualink, in Rockland's high schools, BOCES and Rockland Community College. This communications system will enable the schools to share audio, radio and video resources with all of the police agencies in Rockland County in the event of an emergency incident.

Additionally, the Sheriff's Office has continued to monitor the transportation of crude oil by rail through Rockland County and has worked in collaboration with the Rockland County Office of Fire and Emergency Services, the Health Department and representatives from municipal law enforcement agencies to develop a tool to aid first responders in our emergency response to a critical rail incident. The Sheriff's Office also has started work with the Police, Fire and EMS community along with CSX Transportation and NYS DHSES to hold a full scale exercise in Rockland County in 2015.

Opening the new public safety Communication Center in 2013 was a critical step in improving and advancing emergency communications for our residents. This year the Communications Division staff served as the point of contact for the Ebola outbreak which was coordinated with our County Health Department, to insure 911 calls were screened and information was shared to ensure everyone's safety.

The following are some of the additional accomplishments in 2014:

- The Police Division trained all of our officers in the administration of Naloxone, the antidote for opiate drug overdoses, to help combat the epidemic of heroin and prescription medication abuse and continued to coordinate a drug take back program that allows people to safely dispose of unwanted prescription medication so it does not end up on our streets.
- The Communication Division coordinated the full transition of the County Fire Service to the new 700 Mhz. interoperable radio system, deployed simulcast UHF fire paging and completed testing with 3 of the 4 wireless carriers for text-to-911.
- The Civil Division attained re-accreditation through the New York State Sheriff's Association by maintaining standards and operating procedures consistent with the State Sheriff's accreditation program as well as standards set by the New York State Division of Criminal Justice Services. The Division also recovered \$4,500,000.00 by enforcement of court mandates which resulted in approximately \$440,000.00 turned over to Rockland County's general fund.
- The Corrections Division reduced overtime costs by implementing new training and suicide prevention policies developed in collaboration with our colleagues from the Department of Mental Health, overhauled the commissary system that serves inmates and their families without cost to the taxpayers and installed a new perimeter fence and updated cameras to improve the safety of the Correctional Center.

As your Sheriff, I will continue to work collaboratively with all municipal officials in Rockland County, to effectively manage my budget and protect the taxpayers of our county. I also pledge to fairly enforce the law and to keep all of our residents, in all of our communities safe. Additionally, I will continue to make certain that the Sheriff's Office does all it can to make Rockland a safe place to live, work and raise our families.

Sincerely,

A handwritten signature in black ink that reads "Louis Falco III".

Louis Falco III
Sheriff

Communication Division

MISSION STATEMENT

As the primary communications center for the County of Rockland, the Communications Division of the Rockland County Sheriff's Office helps to maintain effective communication between County agencies, County employees, first responders, and the general public. The Division advances public safety and well-being through dispatch and coordination of County resources, and by acting as a central point of contact for government services. The timely and professional delivery of these communication services enables the Division to contribute to the safety and security of both Rockland County and the Hudson Valley region.

New Emergency Communications Center

In 2014, the Communications Division formally moved into its new Emergency Communications Center (ECC). The facility's design is based on research into the latest trends in emergency communications. The

ECC can accommodate up to fourteen Radio Operators, along with one supervisory platform, several administrative offices, and a training room. The County's previous facility accommodated no more than four Operators, with some overflow housed in a temporary trailer. The new center is the result of several years of planning and construction.

The new ECC also houses the central electronics for the County's new Public Safety Communications System. The system is protected by two independent emergency standby generators, either of which can power

the system for up to a week in the event of utility loss. Replicated servers and specialized equipment provide critical redundancy. The core electronics room is protected by a waterless fire extinguishing system, to prevent damage to sensitive electronic equipment. An entirely separate backup communications center is planned for 2015, for the ultimate in resiliency.

Inside the ECC, Radio Operators receive emergency calls via E-911 and traditional landline, and send appropriate emergency units or offer other assistance to callers. During large-scale County-wide emergencies, the ECC may receive thousands of calls in a single day. The ECC can queue up to 45 simultaneous telephone calls for processing. Operators track incidents using a sophisticated computer-aided dispatch (CAD) system, with integrated digital mapping. Responders are dispatched by a variety of methods, including radio, pager, telephone, email, and text

messaging.

E-911 Call Processing

In 2005, the Communications Division assumed sole responsibility for the receipt of cellular E-911 calls in Rockland County. The exponential growth of cellular telephone calls places a strain on emergency call-takers during large-scale or high-visibility emergencies, such as highway crashes, building fires, and events that occur in public venues such as shopping malls and parks. In 2014, the Communications Division implemented automated call distribution (ACD), wherein a computer assigns calls to call-takers and helps ensure efficient processing of E-911 calls. The Communications Division is currently implementing a structured call-taking program. Among the goals of this program is statistical analysis of E-911 call-processing times. Initial results are expected in 2015.

Mobile Communications Unit

The Communications Division staffs and operates a Mobile Communications Unit ("Command-Van"), a portable dispatch center and incident command vehicle. The unit responds with two specially-trained Radio Operators and is available for emergency response twenty-four hours a day, all year long. The vehicle has its own power generator, heat, air conditioning, galley, and outdoor tent enclosure. The Command-Van can also be "shore-lined" to an existing facility to extend capabilities or add more working area. The unit was originally purchased in 1999, and was upgraded in 2014.

The vehicle can serve as a mobile dispatch center. Telephone, radio, internet, printing, and electronic messaging can all be facilitated independently from the vehicle. The Command-Van can serve as a radio communications base at the scene of incidents in the field, or can act as a replacement for local town or village dispatch centers in the event of failure or evacuation. The unit is equipped with equipment for interoperability on local, County, State, and Federal radio frequencies. The dispatch area can accommodate up to four Radio Operators simultaneously. The Command-Van can also serve as an Incident Command Post (ICP) for large-scale, long-term, or complex incidents. Administrators and field commanders have access to a conference area with television, commercial radio, telephone, fax, print, and internet capabilities. Cameras and video equipment enable scene survey and management abilities from a distance. Communications Division staff regularly participate in local and regional incident command and interoperability exercises with other communications agencies from the New York City metropolitan area.

Fire Dispatch

The Communications Division is the sole dispatch center for Rockland County's twenty-six volunteer fire departments, along with the County's hazardous materials (HAZMAT) team, the Rockland County Regional Technical Rescue Team (RRTRT), Fire Police, and Fire Safety Officers.

In accordance with local law, 130 alarm companies maintain 3,737 automatic fire alarms that transmit signals directly to the Emergency Communications Center (ECC) for emergency fire dispatch. Dozens of other alarm companies report residential alarms and fires via telephone. The ECC manages emergency fire response with thirteen conventional radio frequencies and six trunked talkgroups. Volunteer firefighters are notified to respond by personal pagers, email, and text messaging (SMS) twenty-four hours a day, seven days a week.

In 2014, the Communications Division assumed primary responsibility for dispatch of the New York State Police (Troop F, Mount Ivy barracks). State Police are entirely responsible for the length of the Palisades Parkway in Rockland County, along with certain state properties within the County. Troopers carry radios compatible with the County's trunked radio system. The Communications Division also handles all routine telephone coverage for the barracks, including fingerprints, report inquiries, etc.

Early analysis indicates that State Police volume varies drastically depending on the time of day and day of week, due to commuter traffic. For high-priority assignments, or when State Police resources are stretched thin by multiple incidents simultaneously, the Sheriff's Police Division is dispatched to assist.

Local Police

The Emergency Communications Center (ECC) provides centralized radio and electronic data services to the County's local police departments and the Sheriff's Police Division. Coordination is primarily performed on the County-wide police radio talkgroup for large-scale or multi-jurisdictional events. State-wide and Federal frequencies are also available for disaster scenarios. The ECC provides electronic law enforcement data, such as driver license, vehicle registration, and warrant checks, to five local police agencies, the Sheriff's Police Division, and a host of affiliated agencies in Orange and Bergen Counties, as well as State and Federal agencies.

Services are primarily processed via the eJustice-NY data portal. The Division manages an estimated 10,000 paper records on wanted persons and criminal investigations.

Indian Point Energy Center

The Communications Division serves as the initial contact point for all emergency operations at the Indian Point Energy Center in Buchanan. During an emergency at the power plant, the Communications Division is responsible for notifying County personnel of the matter. The Emergency Communications Center is designated the "Rockland Warning Point" in the Radiological Emergency Communications System (RECS).

If the nuclear event is classified as a high-priority emergency, the ECC would sound the Alert Notification System (ANS) in the County. These are the "Indian Point sirens" well-known by residents. The ECC regularly participates in simulations and drills to test readiness of personnel and equipment for this scenario.

Pomona 1976

Civil Division

MISSION STATEMENT

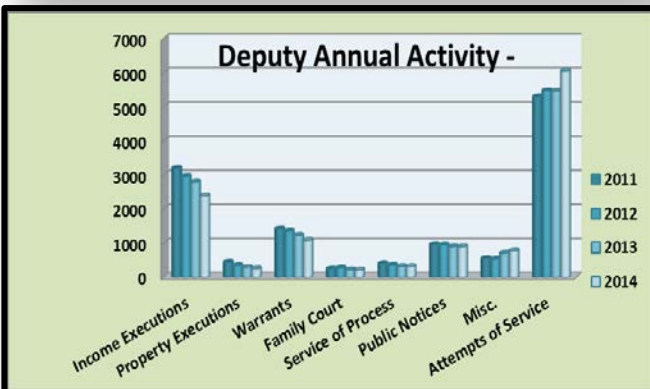

The Rockland County Sheriff's Civil Division is dedicated to the protection of life, property, and maintaining public confidence by providing fair, professional and cost-effective civil law enforcement when serving process, executing judgments and enforcing court orders within the community.

The Rockland County Sheriff's Office was established in 1798. The Civil Enforcement Division's primary responsibility is to enforce court mandates issued out of the civil judicial system. The division is staffed with two commanding officers who oversee six Deputy Sheriff's, two part-time Deputy Sheriff's and five civilian staff members tasked with processing and executing service of process such as summonses, petitions, notices, citations, family court paperwork, garnishments and more, as well as enforcing evictions, property seizures, levies, arrests, and conducting Sheriff's sales of both personal and real property.

Money Generated to the County

In 2014 the Civil Division collected \$4,509,642. The money collected represents all money received from fees charged for services, and the collection of judgments awarded to plaintiffs by the various courts within Rockland County, and throughout the State of New York. It generated \$442,966 to the County's general

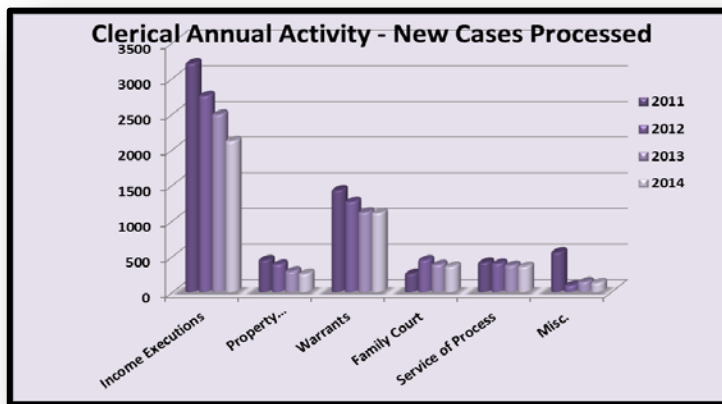

fund. (Since 2002 there has been a 129% increase in total receipts collected and a 109% increase in revenue generated to the County). This figure denotes money collected through fees for service, mileage and poundage fees, as well as, interest from various bank accounts. The Civil Enforcement Division is responsible for enforcing all court mandates, which include mandates such as Income Executions, Property Executions, Orders of Attachment, Orders of Seizure, summonses and subpoenas. The serving of Family Court summonses, Orders to Show Cause, Citations, and PINS petitions are also under the auspice of the Civil Enforcement Division. In addition, it is also responsible for the service and

execution of all Warrants to Remove (evictions) within the County. Warrants of Commitment and Warrants of Arrest issued by the court are also enforced.

Enforcement Activity

Sheriffs' Civil Divisions serve and execute civil court process, such as summons, evictions, Family Court orders, executions, and orders of attachment, orders of seizure, and many more civil process items. Additionally, these divisions must collect and account for millions of dollars received by the Sheriff in enforcing civil judgments. To help Sheriffs assure that these divisions operate efficiently and properly, NYSSA in 1995 developed a civil accreditation program that now contains 121 civil accreditation standards. Standards are divided into ten areas impacting nearly every area of the Division. Standards cover such topics such as records, training, fiscal management, accountability and office operations containing detailed requirements regarding the handling and accounting of money collected for judgments – money collected by Sheriffs on behalf of the County.

In December 2009 Peter Kehoe, Executive Director of the New York State Sheriff's Association, awarded official accreditation to the Rockland Civil Division. It is now among only 15 civil units in the state that has been granted the association's accreditation and it is proof that the Civil Division continues to be an effective unit, even as its

workload has increased over the years. Again in 2014, the Civil Enforcement Division was re-accredited meeting all of the 121 professional standards. The staff members of the Civil Enforcement Division are specially trained to carry out the many complicated steps involved in executing and enforcing civil law enforcement. All employees have completed the NYS Sheriff's Associations' courses on Civil Enforcement as well as standards set forth by New York State Department of Criminal Justice Services and the Municipal Police Training Council for all sworn personnel. All employees have completed the NYS Sheriff's Associations' courses on civil enforcement. All of the Deputy Sheriff's are police officers, certified by the Municipal Police Training Council.

2014 Civil Enforcement Accomplishments

- *Attained re-accreditation with the NYS Sheriff's Association.*
- *Implemented software to streamline the creation of General Orders/Policies & Procedures, assist with archiving previously issued policies and increase accountability.*
- *Enhanced the current system of scanning court documents to existing files to reduce paper files and to have immediate access of the documents by attaching them to each computer case file.*
- *Developed cross training program with local police agencies to assist with handling landlord/tenant issues.*
- *Developed a method of information sharing with RC INTEL to enhance officer safety and assist with investigations.*
- *Created a monthly clerical staff meeting to evaluate operations/procedures/training/new initiatives.*
- *Computerization of cash receipts issued to enhance security and streamline the completion of the transaction*
- *Computerized daily activity reports completed in the field.*
- *Enhanced computer program and forms thus allowing deputies to spend more time on other field enforcement activities*
- *Recovered over \$4.5 million dollars mainly for the residents of Rockland County and generated over \$440,000 in revenue for the County's general fund.*
- *Issued Naloxone, antidote for certain drug overdoses, to all deputies so that it will be available in the field.*

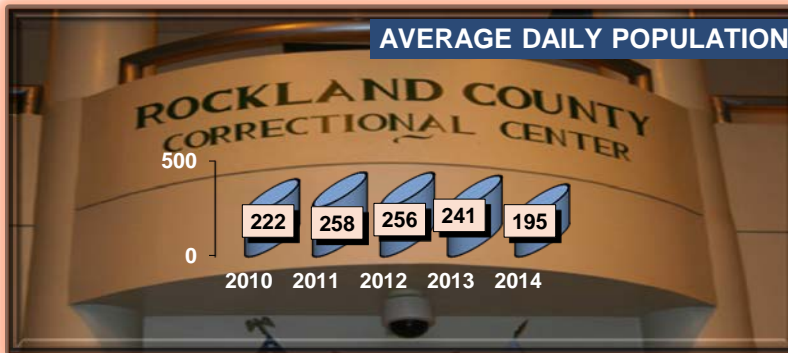

Correction Division

MISSION STATEMENT

The Rockland County Correctional Center will provide detention facilities for males and females over the age of 16 who are either awaiting trial or sentenced to serve one year or less and who have been legally committed by a judge. The Rockland County Correctional Center will additionally provide a secure, safe, humane, well managed, cost efficient, low profiled facility for individuals temporarily removed from society until legally released. It is designed, managed, administered and staffed in order to insure those personnel, inmates and visitors are physically, emotionally and psychologically supported while in the facility. The Rockland County Correctional Center shall provide for its inmates the basic human needs of food, clothing, shelter, health, religion, recreation, family visitation and by offering counseling, education and release preparation services to aid in the inmates return into the community.

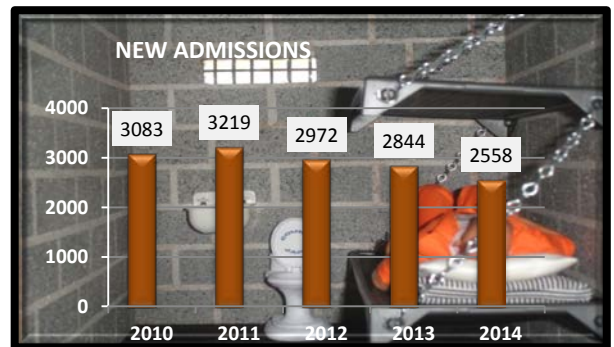

Programs for Inmates

- **Vocational education, career explorations and guidance**-Program for people 21 or under who are interested in finding a career in response to their talents.
- **Literacy programs to improve reading, writing and speaking skills**-One on

one tutorial help for reading, writing, and speaking. Is offered to all ages and will teach English as a second language.

- **Sexuality awareness programs and counseling**-Discusses symptoms of sexually transmitted diseases, individual counseling
- **Alcohol and substance abuse programs**-Through the use of support groups, members learn how to abstain from the abuse of alcohol, cocaine and/or other narcotics
- **Life skills and vocational programs for youth**-Helps youth under the age of 21 choose, find, get and keep a job
- **Parenting skills**-Workshops to aid in parenting and staying in touch with children while in Jail
- **Occupational skills for women**-Program that helps women inmates explore areas such as substance abuse, child abuse, and women's role in society
- **General Equivalency Degree programs**-Program for adults who do not have a high school diploma and who want to work toward obtaining one while incarcerated

- **Vocational training in areas such as computer skills**-Courses on basic computer operations, in addition life skills programs

Community Service Work Program

The **SHERIFF'S OFFICE COMMUNITY SERVICE WORK PROGRAM** is a cost effective alternative to incarceration. Although estimates of the cost of confinement may vary widely, criminal justice experts agree that the cost of confinement is the most expensive form of punishment. By allowing offenders to report and perform community service work, offenders are able to "pay their debt" in a more productive manner while eliminating the costs of confinement. Since its inception in 1985, thousands of offenders have worked hundreds of thousands of hours resulting in significant savings in the cost of labor to various local community agencies.

In many cases, the cost of this labor may have prevented many projects, routine and special, from being accomplished.

The program operates seven days a week from 7:00 AM until 3:00 PM. A uniformed officer supervises Work groups either present on site during the entire period or an unannounced periodic check at the site. The program receives non-violent offenders as well as first time offenders. In **2014**, a total of **13**

different job sites were served with **5,956** hours completed. Their tasks included landscaping, brush removal, litter removal, interior and exterior painting, washing official vehicles, etc. for various county departments, municipalities, public safety departments and numerous religious civic and charitable organizations.

During 2014, the Sheriff's Office Corrections Division partnered with the Rockland County Department of Social Services to save taxpayer money and combat fraud by ensuring inmates in the correctional facility were not continuing to receive benefits that they were not legally entitled to receive while under incarceration. Since the inception of this program more than \$100,000.00 in taxpayer costs were avoided or recovered.

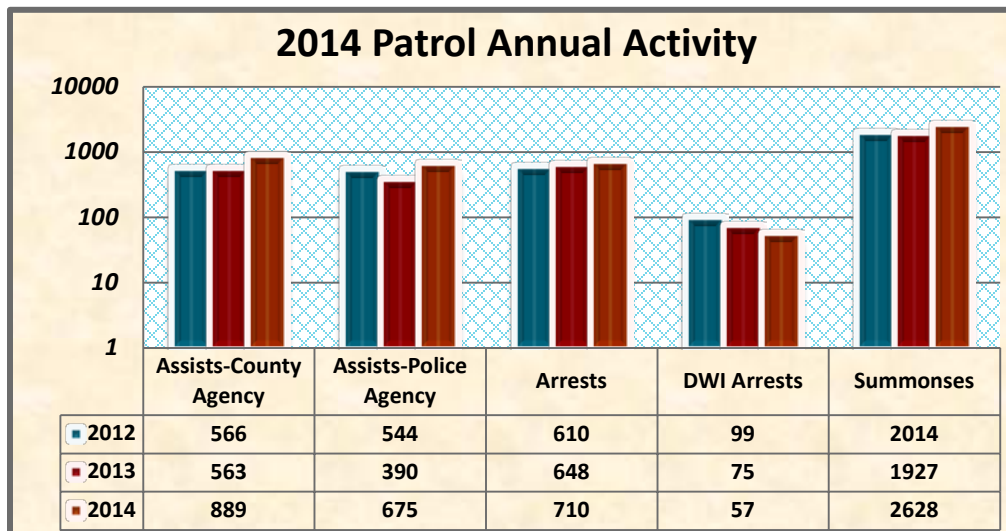

Police Division

MISSION STATEMENT

The Rockland County Sheriff's Police Division is dedicated the to the protection of life and property, reduction of crime through patrol and enforcement, and the provision of a safer environment in which our citizens can live, work, and pursue a better quality of life. This is a 24/7, 365-days a year operation. Officers assigned conduct the primary and basic function of the Division's mission, which is the provision of public safety services to the County of Rockland. These services include physical security and police response to all county operating centers, facilities and holdings including but is not limited to:

- Rockland Community College
- The Robert L. Yeager Health Complex
- The New City Government Complex
- County roads
- County Parks
- Rockland County Jail
- Rockland County Sewer Department
- All county owned properties and buildings

Officers of the uniform road patrol serve all Orders of Protection issued by Rockland County Family and County Courts in addition to the following:

- Missing Persons
- Local Disasters/ other Law Enforcement Emergencies
- Joint Law Enforcement Operations
- Crowd Control and Traffic Enforcement
- Commercial Vehicle Enforcement
- Warrant Executions
- Calls for service in local jurisdictions when requested.
- **The total calls for service for 2014 were 14,508.**

2014 Orders of Protection	
2012	(475)
2013	(478)
2014	(532)

Specialized Units

Prisoner Transport Unit

The prisoner transport unit has responsibility for the handling and movement of all inmates committed to the Rockland County Correctional Facility. They assume the duties of care, custody control of inmates outside the facility. The prisoner transport unit executes all court remand orders from local and county courts as well as orders to produce from both these jurisdictions. In addition officers transport inmates for medical assistance to the local clinics and hospitals and other institutions. Inmates are also transported out of the county to and from State and New York City facilities.

2014 Transport Incidents

County court transport (921)
Justice court appearance (930)
Medical transport (403)
Remand transport (758)
Total – 3,012

Child CARE (Computer Aided Rescue Effort)

A program initiated by the Sheriff and local Chief's of Police. Local schools are visited by trained Officers and the school provides photographs which are identified by name, age, and school. The data is then stored electronically for immediate retrieval in the event of an abduction or missing child report. The division has the capability to transmit photographs and descriptors to police agencies in the Tri-state area and other locations within minutes of the report.

Traffic Safety

Child Passenger Safety

The Sheriff's Police Division runs a monthly fitting station where child seats are checked and parents/guardians are instructed in proper installation and use, by trained technicians. The fitting station is run by appointment only. Besides the fitting stations the CPS unit also runs major events in conjunction with local car dealerships and other police agencies around the county. Seats are procured through grants from the Governor's Traffic Safety Committee and used to replace any seats found to be damaged or outdated.

2014 Child Passenger Safety

Checked Vehicles (190)
 Checked Seats (217)
 Seats Distributed (20)

Police Traffic Services

The Sheriff's Police Division conducts targeted vehicle and traffic enforcement like red light, seat belt and distracted driving (texting and cell phone) violations. The funding for these programs is received through grants from the Governor's Traffic Safety Committee.

Railroad Speed Checks

Recent railroad accidents involving freight cars with hazardous materials (not disclosed to first responders) have caused grave community concern. In response the Sheriff's Patrol periodically monitors the speed of freight trains passing through Rockland.

How is crude oil transported?

By Train

CSX moves 2 crude oil trains per day through the Hudson Valley. CSX has expanded capacity on its Hudson Line.

Each oil train carries 80-120 cars. Each car holds about 30,000 gal. That's 6 million gal. per day—2.2 billion gal. per year.

This crude oil is destined for refineries near Philadelphia, which have expanded capacity.

Traffic may increase with proposed expansion of Global Partners LP oil terminals in New Windsor.

Oil trains along the Hudson. Photo: Riverkeeper

Mounted Unit

The Mounted Unit was established to provide specialized and general mounted police services to all the people of Rockland County. The Unit is staffed by six officers and seven horses stabled at a base in Suffern, New York. All operations and deployments are conducted from this location.

It regularly patrols the County parks and County operating centers. In addition the Mounted Unit participates in community policing functions like crowd control, traffic direction and search and rescue. The ability of the horses to negotiate terrain that vehicles

2014 Mounted Incidents

Police Agency assists (60)
Public assist (49)
V&T Laws (11)
Other (129)

cannot access vastly increases the chances of locating a lost or injured person. High visibility mounted patrols regularly function in conjunction with local police jurisdictions in Nyack, Haverstraw and Spring Valley to provide coverage in areas that have shown a high number of incidents, such as narcotics, robberies, assaults and disorderly conduct.

Upon request, mounted patrols are also conducted in public access and parking areas of local malls during times of high traffic. Mounted Units have also responded to the scenes of labor disputes and public disorder, in order to assist with containment and dispersal operations

Marine Unit

The Marine Unit was established as a full service navigational safety and enforcement unit. It is 50% funded by state revenues and is based in the northern part of Rockland County, New York. It utilizes three vessels to patrol

2014 Marine Incidents

Other (70)

the County's 26 mile water boundary from Bear Mountain South to Palisades, New York. This unit provides enforcement, safety and rescue services

While interacting with all emergency services and environmental agencies. The unit became an integral part in the protection planning following the terrorist events in New York City, Washington and Pennsylvania in 2001. The Unit was tasked with providing security at the Tappan Zee Bridge and the Indian Point Nuclear Power Plant, in conjunction with United States Coast Guard and the Governor's Hudson River Estuary Law Enforcement Task Force. The Tappan Zee Bridge is regularly monitored for all suspicious activities and enforcement of the Regulated Navigation Area around the construction of the new Bridge. The Unit also works with other enforcement agencies along the Hudson River namely Orange, Dutchess, Ulster and Putnam County Sheriff's offices, Westchester County Department of Public Safety, the NYS Police and the NYS ENCON Police. It provides security at the Bear Mountain Bridge, Tappan Zee Bridge and the Indian Point Nuclear Power Plant, in conjunction with United States Coast Guard and the Governor's Hudson River Estuary Law Enforcement Task Force. Recently the Marine unit has been requested to provide contract policing by the Tappan Zee Constructors for the new bridge being built. Coverage will be split between the North and South ends of the county.

Drug/Tracking Canine

In our continuing effort to combat the dangers of drugs the Sheriff's Office has an operational K9 Patrol Narcotics Unit. Sergeant Chris Ford & K9 "Shadow", a German shepherd, provide drug detection & tracking services to police agencies and work to prevent and detect contraband at the Correctional Facility.

Reserve Unit

The Rockland County Sheriff's Reserve Police Force is an all-volunteer force from diverse social, ethnic, religious and occupational backgrounds. It is used to augment and supplement full time law enforcement staff. The unit assists the regular staff during times of declared emergencies/disasters. They may assist with traffic and crowd control at parades, sports/special events, residential house checks, crime prevention and traffic safety.

Investigations

The Rockland County Sheriff's Office Crime Scene Unit was established in 1958 at the request of the Police Chiefs and District Attorney of Rockland County. It is the main source of Crime Scene Investigation for nearly every Police agency in Rockland. The Rockland County Sheriff's Crime Scene Unit has six level 3 fingerprint examiners, certified by the State of New York. No other law enforcement agency in Rockland County has attained such a high level of certification. The members of this unit also provide expert courtroom testimony in county, state and federal investigations.

Warrants/IV D Support Collection

The Bureau of Criminal Investigation conducts criminal investigations into all criminal matters specifically originating within the Patrol Unit, the Correctional Facility, all County owned properties/facilities and all activities related to the municipality and community in general. Officers are responsible for warrants execution and extraditions from outside jurisdictions. Officers carry out investigative work relative to the Department of Social Services Adult Support Collection function. This unit boasts a 90% clearance record for cases received. In addition, the unit also conducts investigations into internal affairs of the department and works with local and state police on matters of mutual interest and concern. The unit renders investigative assistance to all police departments and criminal justice agencies as required. **In 2014 26 fugitive extraditions were conducted from outside Rockland.**

SABIS (Statewide Automated Biometric Identification System)

The Sheriff's B.C.I. houses and mans the Hudson River West Site of the New York S.A.B.I.S. This site has been in operation since the system's inception in 1989. It is one of the 13 sites in the state. As an operational SABIS site, cases are accepted from

any Law Enforcement Agency that makes a request. In addition to Rockland County agencies, the Sheriff's BCI has received cases from New York and New Jersey State Police, the local field offices of the F.B.I., and local Police Departments in New Jersey. After searching crime scene latent prints manually against possible suspects and elimination prints, this system allows those

2014 SABIS Incidents

Identification (89)
New Cases (262)
New Latents(662)
New Case Latent Compares (9930)

unidentified latent prints to be searched digitally against a database made up of over 3 million fingerprint cards.

As an enhancement to the site the Authenticated Digital Asset Management System (A.D.A.M.S.) has been added to increase the unit's quality and productivity. This system allows complete digital management and enhances latent prints while searching the NYS database and the federal (FBI) database of over 40 million fingerprint cards thereby increasing the number of total identifications.

Bomb Disposal and Explosive Detection

In a continuing effort to combat terrorists and domestic acts of violence, the Sheriff's Office has established a fully operational Bomb Squad (4 technicians) with three full time K 9s "Annie", "Cable", and "Gibson" who have explosive detection capabilities. Since 2006 the Bomb unit has received extensive funding through available federal grants. These grants were utilized to initially start the unit and since have paid for

their training and equipment. It has also covered the purchase of two well-equipped response vehicles, a total containment vessel and an operational bomb disposal

robot system. In 2012, the funds received through grants have been utilized for the purchase of new canines (due to retirements) as well as new vehicles for the unit. The Team is trained and equipped to respond to all types of

hazardous devices and explosive material incidents, as well as chemical, biological and radiological incidents. The team is also trained in post-blast investigations.

Arson Investigations

The Sheriff's Office has four level 2 (Highest level of certification) and one level 1 investigators available to respond to and investigate fires that are deemed to be suspicious or the cause and origin are unknown. In addition, the unit has a full time K-9 "Scooter" dedicated to the detection of accelerants used to start fires. Scooter was trained and certified by the Maine State Police, and additionally certified by the New York State Academy of Fire Science K-9 Program. The dog and handler test and recertify for both agencies annually. A partnership with the Orange County Arson K9 ensures mutual coverage for both counties all through the year.

The Arson unit also implemented the Juvenile Firesetters Program (designed to keep juveniles who have set fires out of the court system). The Rockland County Juvenile Fire setter Program is a multi-level approach to the education and/or treatment of identifying juveniles involved in fire setting behavior. The program is adaptable for preschool ages through teens. Participation is voluntary except for those referred by authorities.

Polygraph

The Sheriff's Office certified polygraph examiners assist all local police agencies and the District Attorney's Office with criminal investigations by administering polygraph examinations. The unit is also responsible for conducting Post Conviction Sex Offender Testing for the County Probation Department's registered sex offenders. The sex offenders are required to submit to a polygraph examination every six months to determine if they have been abiding by their Supervision and treatment stipulations while in the community.

Composite Sketch Artist

This agency maintains one of only two composite sketch artist in Rockland County. The artist can provide a rendering of possible suspect for any requesting agency.

Background Investigations

Background investigations are conducted for various requestors including but not limited to local Police Agencies, all local Fire Departments, the County Executive and some Rockland County Department heads.

Ballistic Tank

This agency maintains a ballistic projectile recovery tank sytem which provides a safe and reliable means for recovering spent bullets. The recovered spent bullets are then sent for forensic testing to the New Yorks State Police ILaboratory. This service is prvided to all law enforcement agencies in Rockland.

Gun Keeper Program

The Police Division has installed a read only version of the Gun Keeper Program which is the same program used by the Rockland County Clerk's office to manage gun applications/permits in Rockland County. It provides the 24/7 access to the permit status of pistol permits issued by Rockland County Clerk's office, and enhances officer safety before the execution of search warrants/arrest warrants or when Orders of Protection (Weapons Seizures) are served.

Live Scan Fingerprinting System

The Rockland County Police Division utilizes the Live Scan Fingerprinting System. All fingerprints are taken digitally and sent directly to Albany for processing using a computer. On a daily basis criminal subjects are fingerprinted as well as private citizens. This office provides their fingerprinting services for the Rockland County Clerk's Office (Pistol Permit Section) almost every day. This Office also provides fingerprinting for the private sector for licensing such as nursing, or childcare certifications. In case where the identity is in question, their fingerprints can be sent out directly and returned within two hours.

This Division now also has the ability to process fingerprints in the field through the use of a portable unit that was acquired through funding provided by STOP DWI. In 2014 all of the digital fingerprint equipment was upgraded through the use of asset forfeiture funding.

Leads On Line

Leads Online is a tool used by the Sheriff's office in partnership with the County Office of Consumer Protection and local businesses to help recover stolen property, and solve crimes. Leads Online is the link between investigators and missing items or individuals. It is an online investigative system which helps law enforcement catch criminals, while helping businesses reduce the hassles of reporting, since they are typically required by law to report their transactions to law enforcement. This service is provided to every law enforcement agency in Rockland, through the Sheriff's Office.

Counter-terrorism/Emergency Management

The Counter Terrorism / Emergency Management Officer is engaged in the following Rockland County and New York Metropolitan Regional groups for the purpose of situational awareness and to be a source of local information for regional operational plans incorporating Rockland County in the strategic planning of the security of the region:

Office of Fire & Emergency Services Operations Liaison
NYS Weapons of Mass Destruction Program Liaison
NYS CTZ – 4 Anti-Terrorism Operations Liaison
NY Metropolitan Anti-Terrorism Committee Liaison (NYC)
RC Health Department Liaison
RC Bio-Terrorism Committee Liaison
RC E.O.C. Command Center Operations Liaison
Liaison- Hudson Valley Transportation Management Center
Liaison - NYS Regional Hurricane Preparedness Planning Member of RC Law Enforcement Planning Committee
Rockland County A.T.A.G.
Liaison- NYS Office of Public Safety Exec.Comm.CT
Secure the Cities Project / NYC Police Dept. Liaison
NIMS / Incident Command System-
DHS-Protect Critical Infrastructure Program

A primary responsibility of the Emergency Management / Counter Terrorism Prevention, Planning, Response and Mitigation position is to find ways to facilitate the expansion of timely training for Law Enforcement and other Emergency Services in the responsibilities of Counter-Terrorism deterrence and response. To this end, the Office was directly involved in the design, support and operation of NYS Counter Terrorism Zone 4 since its inception in 2002.

To accomplish these directives several major training events were facilitated with the participation of all the Rockland County Municipal Law Enforcement Agencies, Rockland County Office of Fire and Emergency Services, New York State Police, the FBI NY Offices and the NYS Office of Homeland Security and Emergency Services who funded the projects.

"RADIOLOGICAL DETECTION EQUIPMENT UPDATE AND EXPANSION"

In partnership with the Securing the Cities program, the Sheriff's Office hosted additional radiological detection training to an additional 63 police officers at no cost to taxpayers. Additionally, the program was expanded to provide training to twelve town and village fire and building inspectors.

As part of the overall effort to maintain vigilance an additional 270 Personal Radiation Detectors (PRD's) were acquired to increase the radiological/nuclear detection capability county-wide. These new PRD's will add to the existing issued equipment and allow for the recalibration, repair and refurbishment of existing equipment without allowing for any gaps in coverage during the maintenance phase.

The Securing the Cities program is a federally funded nationally recognized pilot program to design and implement an architecture for coordinated and integrated detection and interdiction of illicit radiological and nuclear materials that may be used as a weapon within the metropolitan area.

Securing the Cities is a coordinated effort involving the US DHS Domestic Nuclear Detection Office, the New York City Police Department and 13 principal partner law enforcement and other first responder agencies in New York, Connecticut and New Jersey. This program provides Preventative Radiological / Nuclear (Rad/Nuc) Detection, (PRND), equipment

and training to the agencies surrounding New York City to increase the regions overall ability to detect and interdict a radiological or nuclear attack. The intent of this program is to develop a multi-jurisdictional, multi-pathway defense architecture for the Rad/ NUC defense of New York City and the surrounding region.

The Rockland County Sheriff's Office is one of the 13 principal partners in the Securing the Cities Program. All Rockland County Police Agencies voluntarily participate in the program as sub-partners and are actively surveying their respective jurisdictions for the protection of our citizens. Upon receipt of all Equipment & Training as presently planned, the County of Rockland will have received a total of \$4,261,733.00 of DND O Counter Terrorism Support.

"RAIL DISASTER EVACUATION TOOL"

A collaboration of First Responder Agencies including the Rockland County Sheriff's Office, representatives from local municipal law enforcement agencies, and The Rockland County Office of Fire and Emergency Services has developed a tool for first responders to aid in evacuations and traffic control in the event of a rail disaster.

The rail evacuation planning tool consists of a map that creates two half-mile grid sectors on each side of the west shore freight rail line that runs north-south through the county. These grids encompass a total of one mile on either side of the railroad tracks. Within these grid sectors, rail crossings and traffic control points will be identified and other important infrastructure and high risk facilities such as schools, nursing facilities, and office and industrial complexes and buildings are identified. This tool is being developed by a combined effort of Police, Fire and Emergency Services personnel.

Shared with the fire service, these sectors provide a “quick look” at any affected grids where a rail accident occurs and a decision can be made to shelter-in-place or evacuate those affected sectors. As part of the work in progress, NY-ALERT calling groups are in the process of being created to facilitate a quick and efficient means of notifying residences and business in the affected areas. Once completed, this tool will be delivered in the form of a guidebook for police and fire desks, and an electronic version for distribution to police cars and fire units with laptop capability.

“RAIL DISASTER DRILL”

The Rockland County Sheriff's Office in partnership with the Rockland County Municipal Law Enforcement agencies, the respective Fire and Emergency Medical Services of the various Towns and Villages, Rockland County EMS , and the Rockland County Office of Fire and Emergency Services along with CSX Transportation began development of a full-scale exercise simulating the derailment of a freight train with cars carrying Bakken Crude Oil. This exercise, as well as preceding tabletop exercise, is scheduled to take place in 2015.

Rockland County Special Investigations Unit (S.I.U.)

On February 9th 2009 the Rockland County Sheriff's Police Division and the Rockland County District Attorney entered into partnership when forming the Rockland County Special Investigations Unit. This Unit prosecutes complex cases involving public corruption, white-collar crime, tax fraud, consumer fraud, and other traditional and non-traditional criminal conduct, including organized crime. The Unit uses a variety of techniques, including undercover operations, eavesdropping warrants and the investigative authority of the Grand Jury. The SIU encompasses several specialized functions which include the real estate Fraud Investigations task Force and the Asset Forfeiture Unit. The SIU has conducted joint investigations with the FBI, the US Secret Service, the NYS Banking Dept., the NYS Tax Dept., The NYS Dept. of Labor, the Social Security administration, HUD and many other agencies.

Countywide Special Operations

Regional Entry And Counterterrorism Team (REACT)

The role of law enforcement in all cases, including acts of terrorism, riotous activity, insurrection, barricaded subjects, execution of narcotics warrants, arrest of dangerous felons, and the rescue of hostages or endangered persons, is the protection of lives and property. In the pursuit of this goal, the Rescue, Entry, And Counter Terrorism (REACT) Team was established.

Rockland REACT is a designated law enforcement team, whose members are recruited, selected, trained, equipped and assigned to resolve critical incidents involving a threat to public safety which would otherwise exceed the capabilities of traditional law enforcement first responders and/or investigative units.

SIGNIFICANT INCIDENTS:

1. On 6/4/14 REACT assisted 4 other SWAT teams in Orange County to search for a homicide suspect possibly hiding in an abandoned factory.
2. Hosted an Explosive Breaching school and now has 6 certified explosive breachers.
3. Hosted an Advanced Negotiators course.

Computer Crime and Forensics

The Rockland County Sheriff's Computer Crime Task Force was formed through the partnership of the Sheriff's Office and the District Attorney's Office, to combat computer-related crime due to the increased use of computers for e-commerce, e-mail and entertainment. The unit carries out a forensic analysis of computer evidence seized by all law enforcement agencies within Rockland County. Online child pornography, pedophilia, business fraud, proprietary information theft, identity theft, credit card fraud, copyright infringement, counterfeiting, remarking computer intrusion (hacking) and terrorism are all areas where the Task Force has been effective.

2014 Computer Crime Stats

*Criminal Investigations Opened (169)
Search Warrant (3)
Police Assists (163)
Forensic Examinations (263)
Educational Presentation (2)*

Disorder Control

The Disorder Control Unit Concept is a method that allows law enforcement to respond to a civil disturbance by mobilizing a group of police officers and supervisors who have been specifically trained and equipped for this purpose. Additionally these officers also play a role in the County's counter-terrorism plan. They can be used for target hardening and special tactical assignments like:

- *Surveillance of critical infrastructure locations*
- *Restricting threatened facility access to essential personnel only*
- *Monitoring, redirecting or constraining transportation systems*
- *Closing or lockdown of public or government facilities*

In order to enable Rockland County Law Enforcement Agencies to respond effectively to all of these situations, the Disorder Control Unit concept was jointly adopted, organized and established by the various police agencies in the county. It is by utilization of this concept that Rockland County Law Enforcement hopes to best serve the people of Rockland County as well as assist neighboring jurisdictions. The Disorder Control Unit concept is a standard part of the county mutual aid plan. Crowds and acts of civil disobedience are dynamic and require a flexible response. While such acts may be constitutionally protected, Law Enforcement Agencies have the responsibility to protect the lives and property of all people.

Rockland County Police Information Network (RCPIN)

The Rockland County Police Information Network is used to assist in the records management and information sharing associated with Law Enforcement. The Records Management System that is operational contains information on the people, places and vehicles that are involved in each of following areas:

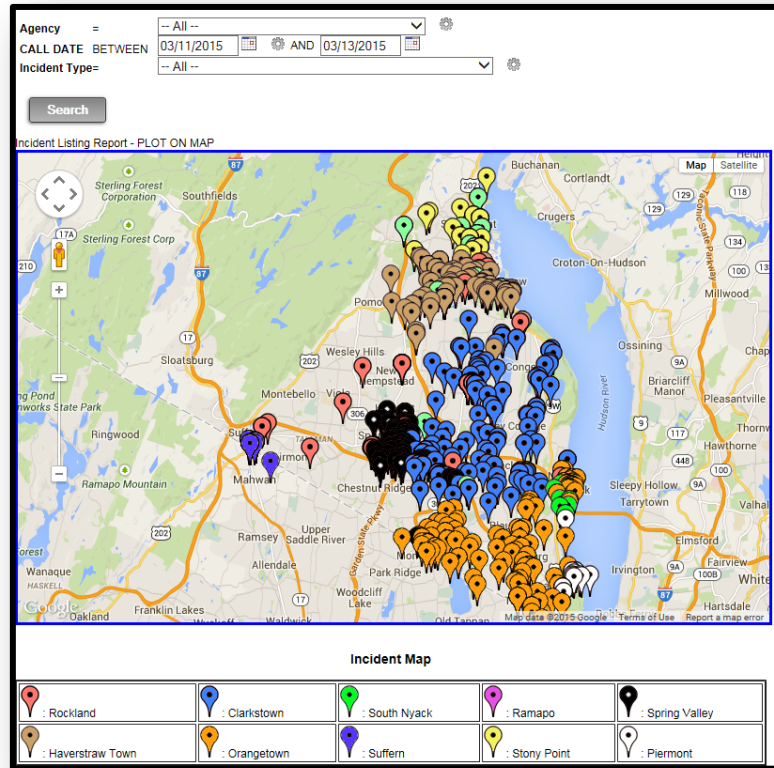

****Incidents*Cases*Arrests*Property*Warrants*Tickets*Accidents***

Rockland County, New York like many other government agencies has constant needs for information retrieval. Significant technical challenges exist because the information is distributed amongst various backend database systems used by the numerous police agencies. For example, when law enforcement wants to search for information on a particular person, up to 4 different applications need to be accessed and searched individually resulting in safety vulnerabilities and lost productivity.

To solve this problem, PlanetJ, using the WOW Multi-System Query Engine feature, teamed with Rockland County to produce several graphical browser based queries. These queries allowed entry of selection criteria which was used by the WOW engine to search multiple backend databases. Results that matched the search criteria are automatically combined and presented to the user on a single integrated screen. This provides a significant time savings for Rockland users and enhances public safety in cases where real time immediate information is needed.

RCPIN gathers and collects a large amount of data from surrounding communities. What Rockland County needed was a single, efficient, and easy-to-use application that could retrieve data stored on various backend database systems and used by numerous county agencies. This application would need to be able to provide a quick way of collecting and providing data for detectives.

RCPIN is also utilizing a web based Google Maps integration to plot crime statistics for analysis and trends. The end user can select one or all agencies, date range and filter for specific crimes or all incidents. Once the points are plotted on the map the user can then select a point to see the details of the call for service. They then can click on a link to actually "drill down" into the database which will return details of the call.

SERVICES PROVIDED:

- Comprehensive Records Management System
 - Multi-Jurisdictional
- Ejustice Portal Access
- NCIC interface – DMV, etc.
- ComnetiX Livescan Electronic Fingerprinting Access
 - Hosted by Clarkstown PD
- Bar Coding Evidence Processing
- Remote client connections to key law enforcement personnel
- RCPIN secure email – Outlook Web Access
- Enterprise AntiVirus
- Enterprise Spyware Sweeper
- High Availability – Off site data replication
- Mutli-Jurisdictional Web Based Data Sharing
- Custom Web Based Police Reports
- Web Based Data Executive Dashboards
- Web Based Graphical Reporting Tools

PROJECTS:

- ALL Police Agencies are now on MS Search Page
- Upgrading all network hardware
- Evaluating new Records Management System Software
- Upgraded All IBM i5 Series Servers Operating Systems
- Expanding the Mutli-System Search Data Sharing Project to counties surrounding Rockland
- Migrated core Windows Servers to VMWare environment - continued
- Plan for new Linux platform shared Records Management System - in bid evaluation
- Connect Radio HQ with RCPIN Data Ctr via high speed fiber
- Continue to roll out Cell based mobile solution to Police Agencies

Rockland County INTEL

The Rockland County Intelligence Center (RCIC), founded in 1995, arose out of a recognized need for a coordinated effort to develop and disseminate intelligence between law enforcement agencies. Criminal organizations and individuals are more sophisticated, more mobile, and better educated than ever before. The challenge for law enforcement is to be prepared for this increasing sophistication in order to reduce the impact of criminal activities on our communities. In order to accomplish this, law enforcement agencies will need aggressive, comprehensive strategies to counteract the threat of criminal groups. Criminal intelligence, when developed and used effectively, is a major weapon in the law enforcement arsenal.

MISSION

To provide intelligence to law enforcement agencies based upon the collection, evaluation, and analysis of information that can identify criminal activity. This intelligence can be presented in the form of:

1. Strategic Intelligence-which addresses existing patterns or emerging trends of criminal activity.
2. Tactical Intelligence-which pertains to a specific event that can be used immediately to further a criminal investigation or patrol function.

P.O. Box 295
New City, N.Y.
10956

Chief Paul Modica
Oversight Committee Chairman

Personnel

RCIC services all law enforcement agencies and is comprised of sworn officers from Rockland County law enforcement agencies. Departments currently represented:

- Ramapo Police Department
- Rockland County Sheriff's Office
- Spring Valley Police Department
- South Nyack-Grand View Police Department
- Piermont Police Department
- Orangetown Police Department
- NYS Police
- NYS Parole
- NYS Park Police

Databases

- HIDTA
- MAGLOCLEN
- Leads Online
- NYC School Construction Authority (Mobnet)
- Rockland County Sheriff Corrections
- Rockland County Police Information Network
- ISO Claimsearch
- Autotrack
- Clear
- N-dex
- Justice Exchange
- NYSPIN

Services

- Photo Arrays-create line-ups from HIDTA and Web RIC photographs
- Surveillance (Still, video)
- Cell tower tracking
- GPS Tracking
- Video Flyers

The Intel Center officers are assigned specialized "desks." Each desk focuses on a specific type of criminal activity including:

- Street Gangs
- Burglary/Robbery
- Terrorism
- Traditional Organized Crime
- Factual Data Analysis
- Identity Crime
- Jail Intelligence Program

Intelligence Products

Information Bulletins—produced in response to new trends or high priority issues. This information is quickly relayed to the law enforcement community and is intended to alert agencies of a particular pattern or event.

Monthly CODE 6 (Countywide) Report

Monthly burglary/robbery analysis report -detailed as to time of day, method of operation, suspects, victims and proceeds.

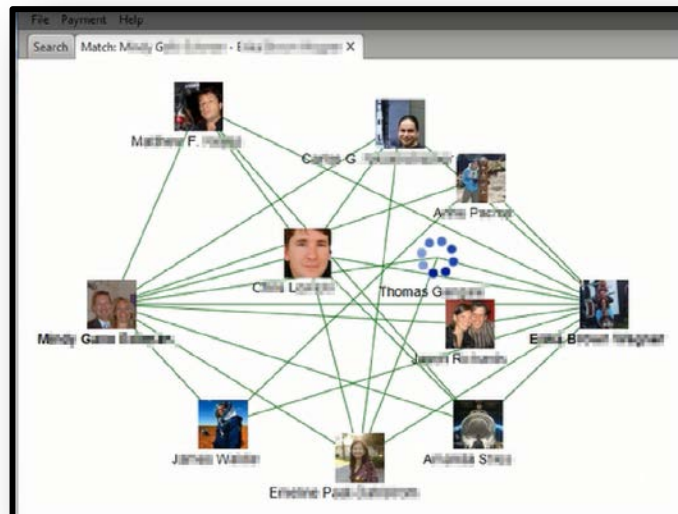

Parolee Dissemination— provides local parolee information categorized as to crime conviction.

Gang Awareness—Provides information on local and regional gang patterns...

Telephone Toll Analysis—Analyze phone call records (scanned or disk media) and provide in-depth reports.

Link and Commodity Charting—Produce charts and images which give a visual representation of information known about a case, and how the pieces relate to one another.

Crime Tracking (Mapping) - Produce maps which illustrate a visual representation of crime in a specific jurisdiction as well as in bordering jurisdictions.

Rockland County Police & Public Safety Academy

The year 2014 saw an increase in attendance at training programs and events presented by the Rockland County Police and Public Safety Academy. The courses presented reflected current and emerging issues in law enforcement while addressing the increasing complexities of police work. Training plays a critical part in maintenance and upgrading of skills for the professional law enforcement officer. In recognition of this fact, all courses presented at the academy are carefully selected to meet the needs of the law enforcement agencies we serve.

The 2014 In-Service training program addressed low light shooting techniques, room entry, negotiating stairways, room extraction PX (Practical Exercise), Milo Interactive Shooting PX, active shooter scenarios, Article 35 New York State Penal law (Justification of the Use of Force), legal updates, human trafficking "Blue on Blue" confrontations, CPR/First Aid/Defibrillation recertification, blood borne pathogens, self-first aid under combat conditions, mask fit testing, first aid for active shooter victims, MACTAC Practical Exercises, active shooter practical exercises, crowd and disorder control training/practical exercise. In the area of investigation, training was conducted by the Federal Bureau of Investigation on the use of digital cameras at crime scenes, surveillance photography and crime scene processing. Other investigation courses offered included Criminal Investigators Course conducted by the F.B.I, an Internal Affairs Course and an Intellectual Property Theft Course.

The academy offered a number of training courses in the use of weapons in 2014. These courses included Sniper Training, Taser Instructor, Carbine Course, Flying Armed Certification and Annual Training for Peace Officers with Firearms and Other Weapons. The courses were offered to insure that our officers are trained to use "state of the art" equipment in protecting their communities. By sharing resources with our partners in emergency medical and firefighting training, the academy shared access to a "state of the art" driving simulator. Officers from the various police agencies were trained to operate the simulator and it is available for use by each department as well as the academy staff. The driving simulator was used as part of the 2014 recruit training.

In August, the academy hosted the FBI National Academy associates for a one day training session. The Association consists of law enforcement officers who are graduates of the FBI National Academy in Quantico, Virginia. The training consisted of a lecture at the academy and qualification at the firearms training facility.

Working with the Rockland Alliance for Prevention and the Police Chief's Association, the academy staff assisted in developing the ninth "Community Policing to Advance Youth

Development Symposium” which was held at the academy on October 9, 2014. One hundred and fifty students and police officers attended the symposium.

The academy Director, as a member of the Criminal Justice Committee of the Stop Fear Coalition, worked with the committee members on presenting a training conference at Rockland Community College in November. The training was titled *Money, Power and Religion: The Susan Brock Investigation*. The presenters were the Detective Sergeant and the prosecutor that handled the case that took place in Arizona. The attendees were shown evidence, police and media reports, as well as audio and video recordings of interviews dealing with the sexual abuse case. They were made aware of the manipulative techniques employed by Susan Brock to coerce her victim, his family and members of their church for her to have access to the minor.

In 2014, the academy offered retired officers the opportunity to qualify with their firearms to comply with the Federal Law HR 218. 1992 retired officers attended the course which is an increase of 201 over 2013 and resulted in an income of \$122,830.00. This is an increase of \$11,850.00 in revenue from this program. The academy will continue the program at the firearms facility in 2015 and we expect a large increase in attendance due to changes in the Federal law that eases restrictions on where retired officers are able to qualify and the New York State Safe Act, which requires retired officers to qualify every three years.

FUNDING

Funding for the Rockland County Police and Public Safety Academy comes from the County of Rockland and the various municipalities that comprise Rockland County who have Police

Departments, together with other municipalities outside of Rockland County and private companies that utilize the services of the academy. The County of Rockland contributes 50% of the cost of the operation of the Police Academy. The moneys paid by the County are annually appropriated by the Legislature and are specifically designated for the Police Academy as a separate line item in the overall Sheriff's Department budget. The various municipalities within the County pay the remaining 50% of the expenses.

The share from the municipalities located within Rockland County shall be based upon the ratio between the number of police in its respective departments over the total number of police officers in Rockland County.

FUTURE TRAINING

In 2015 the academy will conduct seventeen (17) four-day in-service training programs. Topics to be covered are as follows:

- Article 35 Use of Force/ De-escalation of Conflict
- Ambush of Police Officers-Tactics to Prevent Ambushes

- Evidence Based Domestic Violence Prosecutions
- Practical Exercises-“Blue on Blue” Confrontations (Friendly Fire) and Ambush Avoidance
- Disturbance Control –Classroom and Practical
- CPR/Défibrillation Recertification
- TECC
- Street Drug Awareness
- Narcon Training to address Heroin Overdoses
- Active Shooter practical Exercises

In 2015 the academy will be hosting training conducted by outside organizations that provide law enforcement training. These include:

- The New York State Division of Criminal Justice will present training for Commercial Vehicle Enforcement and Standard Field Sobriety Test instructors.
- The Federal Bureau of Investigation will present courses on Basic Photography, Crime Scene Photography and Surveillance Photography and provide instructors for our Basic School for Police Officers.
- In October a seminar on the Law Enforcement Officers Safety Act will be presented. It will be conducted by the Honorable Steven Mannion, the leading national expert on the topic.

Firearms training will increase, including additional training in specialized weapons, a Firearms Instructor Course, training on the use of deadly force on the firearms simulator and seven days of additional In-Service Training at the range. The academy will be hosting a Division of Criminal Justice Services certified two week sniper course April.

TRAINING MANAGEMENT

Overall, attendance at training courses and events in 2014 was 4,948. For the sixteenth year, all training records were computerized, thereby making information easily accessible to the agencies that attend training at the academy.

In-Service training was offered on a regular basis, every other week. From January 27 to December 8, 2014 In-Service was conducted as a four-day program. The training covered academic and tactical training topics. A one-day Firearms In-Service program and training sessions on the Firearms Training Simulator were offered throughout the year. There was two full-time Basic School for Police Officers conducted in 2014 and

Revenue	
Basic School	\$103,950.00
In-Service Training	\$44,385.00
Supervisor Course	\$1,800.00
Range Rental	\$25,900.00
Special Weapons Training	\$10,335.00
Security/Specialized Training	\$8,875.00
Retired Officers Qualification	\$122,830.00
Towns/Villages	\$112,324.00
Other Income/Fees	\$120.00
Total	\$430,519.00

48 recruits attended the training. Also attending the Basic Course Refresher were officers who were re-entering law enforcement after being separated for several years. The academy ALSO conducted one New York State mandated Course in Police Supervision. Overall attendance at courses conducted or hosted at the Academy increased in 2014. Agencies such as the F.B.I., D.E.A and the NYS Division of Criminal Justice Services provide training courses that were conducted at the academy in 2014.

Through funding received from the Rockland County Police Chiefs Foundation, the academy purchased medical equipment for first responder training, training DVDs and photo identification equipment for the retired officer's qualification program.

The Rockland County Police Academy and Rockland Community College have renewed the agreement to conduct Pre-Employment Training for Police Officers, which was approved by the State in 2003. A Pre-employment school can only be created by a municipality that has

experience presenting the Basic Course for Police Officers in conjunction with an accredited college having an active criminal justice, public safety program, or other equivalent program registered by the Department of Education. This program is viable and will fill a need to provide police officer candidates to over 54 police agencies throughout the training zone. It will bring in revenue to support both the college and the academy. There are six approved pre-employment programs that are being conducted in the state. Rockland County, the police agencies in the

county, Rockland Community College and the Police Academy will benefit by this program. Nineteen Pre-Employment students attended the spring class of 2014. Six officers who previously attended the Pre-employment training were hired by a police agency and returned to complete Phase II of the Basic School to receive their State certification.

H.E.L.P. Helicopter Emergency Lift Program

The **Helicopter Emergency Lift Program, Inc.** was started as part of the Rockland County Fire Service Mutual Aid Plan in 1969. Organized as an emergency service unit, HELP provides its services to Rockland County only in conjunction and cooperation with the Office of Fire & Emergency Services, the Sheriff's Office, and other emergency service agencies within Rockland. HELP renders a wide range of emergency services, namely, searching, rescuing, aerial firefighting, aerial ambulance work, police assistance and other disaster aid. The Police Division provides two pilots to the program.

ATAG (Anti-Terrorism Analytical Group)

The ATAG group consists of the Sheriff, an Undersheriff from the Sheriff's Office, former Chiefs of Police in Rockland County, four former Special Agents of the

FBI, Secret Service, US Marshall Service, former members of the NYPD, Secret Service and US Marshals Service, a retired General, a former member of Military Intelligence, a person with expertise in school safety and health issues, a military commander familiar with security issues overseas, and a veteran Israeli Army Anti-Terrorism Specialist. They act as a "Think Tank" in order to generate ideas and concepts and to assist in providing recommendations as to the necessity and feasibility for Intelligence and Security procedures. This group has been very helpful since the attacks on 9/11 in assisting the County with the coordination of its counter-

terrorism resources. The ATAG group is a component of New York State's Counter-terrorism Zone 4, which includes Rockland, Orange and Sullivan Counties.

This is a program, which focuses on reducing the criminal victimization of older persons, and the enhancement of the delivery of law enforcement services to these individuals. This program is co-sponsored by the Sheriff's Department, local Chiefs of Police and the Senior Citizens organizations. It is intended to make law enforcement services more responsive to the needs and concerns of seniors. It focuses on crime prevention against the elderly, elder abuse prevention, personal safety tips, home security, neighborhood watch, information about frauds and scams, identity theft, training in coping with door to door salesman and telephone solicitation, recognition and reporting of suspicious activities, victim assistance for and by Seniors, emergency preparation plans for and by Seniors, and communicating with and assisting older persons.

SILVER ALERT

*Former Rockland County Legislator Robert Jackson and the Rockland County Sheriff's Office in collaboration with local police agencies and Triad of Rockland announced the launch of the "**Rockland County Silver Alert System**", a local law sponsored by Legislator Jackson to focus on the rapid and safe return of any at-risk adult who may wander away from their residence or care facility and become lost or disoriented. Similar in nature to "**Amber Alert**" which focuses on missing children, the Silver Alert focuses on missing adults, over the age of 18, who are diagnosed with Alzheimer's disease, dementia, and developmental or cognitive impairments. Triad is a partnership of local police agencies and senior citizen organizations and is committed to the purpose of reducing senior victimization through education, training and involvement.*

NYS Sheriff's Association Summer Camp

The Sheriffs' Camp is located in the Finger Lakes region on Keuka Lake in Yates County. It is six miles south of the village of Penn Yan. The camp, a former YMCA Camp, is owned by the New York State Sheriffs' Association Institute and meets the full compliance of the New York State Health Department. Boys and girls between the ages of 9 and 12 who, because of economic reasons would not have an opportunity to attend a summer camp or enjoy a summer vacation. The camp is for economically challenged children.

Each County Sheriff is given a predetermined number of camper slots. Sheriff's Offices use a variety of methods to identify deserving children to attend. The primary criteria are economically challenged children and children who can benefit with the positive interaction with deputy sheriffs.

The camp is staffed with counselors who are highly motivated individuals and are dedicated to helping young people find the right path to a meaningful and productive life. The ratio of camper to counselor is about 4.5 to 1.

Deputy Sheriffs play two roles within the camp community. Typically, about 4 to 6 deputy sheriffs are in residence during each of the six one-week sessions. They work themselves into the camp's daily curriculum. They work hard to project themselves as mentors to the kids. Other deputy sheriffs visit the camp daily to conduct demonstrations of law enforcement techniques and equipment, such as K-9 and scuba diving demonstrations. Each week a deputy sheriff makes a presentation regarding illicit drugs and alcohol use.

OPERATION MEDICINE CABINET

This program is organized in conjunction with all the law enforcement agencies throughout the county allowing residents to dispose of medications so they won't pollute the environment or get in the hands of those who might abuse or illegally re-sell the drugs. Drugs collected in this ongoing effort are destroyed at a state-regulated incinerator, preventing unwanted drugs from getting into the waste stream and polluting the environment or from getting into the hands of those who would abuse the drugs or sell them to others to abuse.

One of the biggest drug problems today is the illegal sale and use of prescription drugs — especially among young people. Many people who abuse illegally-obtained prescription drugs risk serious injury or death by misusing the drugs. During 2014 more than 2000 lbs. of unused prescription medication was received from the public and destroyed.

VINE

VINE is an automated system that tracks criminal defendants once they enter the corrections system. It has the capability of automatically dialing victims and their family members who have registered with the system to notify them almost immediately if an inmate is transferred, released or has escaped. The system also allows victims or other interested persons to dial in at any time, to confirm that the inmate which they have a concern about is still locked up. The VINE system was first implemented in Louisville, Kentucky in 1994. Within two years the program had spread across the entire state of Kentucky. It then began to spread around the country as law enforcement officials and victims' advocates learned of the important measure of peace of mind the program could bring to victims.

The first live linkage to the New York Sheriffs' Victim Hotline – our version of VINE – was made in 1999. Today every county in New York is linked to the system, along with New York City and the New York State Department of Correctional Services. Members of each Sheriff's staff were trained on how to "populate" and implement the program. VINE is available to victims, and others, in New York.

The VINE service allows victims to make a toll-free phone call or go online at www.vinelink.com to check an offender's information. Users also can register to be notified by phone or e-mail, and in the coming months by text message, if an offender's custody status changes. VINE is now a fixture in America's modern corrections systems. Presently, VINE Tracks 2 Million Offenders or 90 percent of the jails and prison population nationwide. During 2009, VINE also fielded over 3.8 million incoming calls from crime victims and other concerned citizens inquiring about an offender's status and received 1.6 million new registrations. Total calls to and from VINE topped 17 million for the year. Since VINE was created in 1994, the system has delivered more than 102 million notifications. In the time since VINE's inception, these crime victims have enjoyed security and peace of mind, knowing the VINE system is always.

Order of Protection Notification Project

SAVIN is an acronym for Statewide Automated Victim Information and Notification. The U.S. Department of Justice, through the Bureau of Justice Administration (BJA), implemented the SAVIN program to assist states in building, implementing, and improving victim notification strategies and systems throughout the United States. The New York Sheriffs' Institute is the lead SAVIN agency for New York State. The key to the success of this project is the collaboration between law enforcement, courts, victim advocacy groups, and emergency management agencies. The Sheriffs' Institute is currently working in close partnership with the New York State Association of Chiefs' of Police, the New York State Police, the New York State Division of Homeland Security and Emergency Services, the New York State Unified Court System, the New York State Office of Prevention of Domestic Violence, the Westchester County Department of Women and the New York State Coalition Against Domestic Violence to assure the successful development and implementation of this project.

The period of time immediately following the service of an Order of Protection is recognized as the most crucial period for a victim. Abusers are often more violent during a period of separation. This project will develop and implement a system that will notify a victim when a Family Court Order of Protection has been served. Of course, the decision to take advantage of this service is the victim's choice. If the victim chooses to register for this service, the notification may provide an opportunity for the victim to be proactive and take appropriate precautions during this precarious time allowing the victim to implement a personal safety plan for themselves and any impacted children or other family members. This system is a 24-hour/7 day per week notification service made available to victims who have been granted a Family Court Order of Protection in any Family Court outside of New York City. The system allows the victim the option to register through NY-Alert (www.nyalert.gov) to receive notification when the Order of Protection has been served. It also allows the victim to select how they choose to be notified.

Revenue since 2001

2001	Dept. of Justice ICAC	
	Internet Crime Against Children	\$45,000.00
	Arson Vehicle LLEBG	\$48,000.00
